

FAUNA & FLORA

Fauna & Flora is a very visual and decorative trend, transporting us to a fun world where new textures and floral graphics stand out. Embroidery and prints inspired by spring motifs are the theme of this youthful, fresh collection. A palette consisting of happy colours will help in the transition to the new season, with pastel, camel, green, red and black tones, which make this a collection that exudes joy and happiness.

CLEAN UTILITY

Refreshing minimalist neutral tones and looks for the beginning of the season. Metallic colour details and materials help create perfect looks for the change of season. Copper and silver add a more modern touch to the purses and bring out a blend of warmer, stronger tones, such as electric blue, red or salmon pink. Crocodile skin effects, smooth textures and metallic details show the more feminine and modern side of this trend.
